

DMYTRO NOUR

AI PRODUCT & OPERATIONS BUILDER

Technical Product Support | AI Operations | Implementation

Athens, Greece | Remote / hybrid | Open to relocate in Europe

dmитri.nour@gmail.com | dmytronour.work | LinkedIn

PROFILE

AI-native product and operations builder with a customer-support foundation. I turn ambiguous customer problems into clear workflows, useful product changes and practical AI-enabled systems. I built and launched consumer and B2B products, including CreatorZen with **5,000+ organic downloads**. I am looking for a strong team across technical product support, product operations, AI operations or implementation.

SELECTED PRODUCT WORK

CreatorZen | Founder / AI Product Builder

2025 - Present

AI-powered iOS assistant for creators

- Took the product from concept through App Store launch, onboarding, analytics, QA and iteration; reached **5,000+ organic downloads**.
- Worked on activation, personalized ideas, planning, energy check-ins and release quality; used PostHog and user feedback to find friction and prioritize changes.
- Built profile-import personalization with Apify, LLM analysis and Supabase; kept context editable and added fallbacks for incomplete source data.

FounderDistro | Founder / AI SaaS Builder

2026

B2B AI SaaS experiment

- Built and launched a workflow turning company context into founder-led content strategy and editable posts using Next.js, Supabase and AI research tools.
- Owned onboarding, integrations, testing, distribution and funnel analysis; made a data-informed **no-go decision** after weak activation and conversion.

CUSTOMER AND OPERATIONS EXPERIENCE

Wizz Air | Cabin Crew / Customer Experience

Feb 2022 - Jul 2024

United Kingdom

- Worked in safety-critical, time-sensitive operations across international teams; handled customer issues and clear handoffs while following strict procedures under pressure.

Nerdify | Customer Support Representative

Jul 2021 - Jan 2022

- Handled written support in English, clarified ambiguous requests, triaged issues and managed **6-8 parallel conversations** during busy periods.

CAPABILITIES AND TOOLS

Support: Issue triage, bug reproduction, customer communication, onboarding, documentation and escalation judgment.

Product & AI Ops: Requirements, prioritization, QA, PostHog funnels, API / LLM workflows, human review and fallback design.

Tools: Supabase, REST / JSON, Apify, Firecrawl, Make, Zendesk, Figma and SQL fundamentals.

Developing: Hands-on Salesforce / RevOps workflows around CRM data quality, routing, Flow and testing.

EDUCATION AND LANGUAGES

Education: Polish Matura and technical school diploma. IBM AI Product Manager Professional Certificate - in progress.

Languages: Ukrainian native; English C1 / professional; Russian fluent; Polish conversational; Greek beginner.
