PROFILE

English-language customer support at Nerdify and over two years in customer-facing operations at Wizz Air. Since 2025, I have handled user emails, feedback, bug investigation and release QA for CreatorZen, my own iOS app with 5,000+ organic downloads. I am looking for a product support role where I can resolve customer issues and help teams prevent recurring problems.

EXPERIENCE

Product Owner, User Support & QA — CreatorZen · independent iOS product **2025 – Present**

- Manage user emails and in-app feedback; reproduce reported problems, test changes and follow up after releases.
- Handled a user accessibility complaint by explaining planned improvements, shipping a fix and informing the user when it was live.
- Used PostHog funnels and qualitative feedback to identify onboarding friction and simplify the user journey; reached 5,000+ organic downloads.

Product Builder & Release Lead — Bodyclimb · independent fitness iOS app **2026**

- Took the app from concept to App Store submission in 14 days: 3 days of research/specs, 5 days guiding AI coding agents, 5 days QA and fixes, 1 day release preparation; subsequently approved by Apple.

Founder & E-commerce Operations — Svitlodiod.ua · independent online retail business **2022 – 2023**

- Built a profitable LED lighting store; sourced products in China and Ukraine and reinvested earnings across three inventory batches.
- Handled customer messages, payments, fulfilment and returns; maintained order records, including 300+ shipments marked as received.

Cabin Crew / Customer Experience — Wizz Air · UK **Feb 2022 – Jul 2024**

- Supported passengers through disruptions and sensitive situations; communicated clear next steps and coordinated with crew during safety-critical incidents.

Customer Support Representative — Nerdify **Jul 2021 – Jan 2022**

- Handled up to 6–8 English-language support chats at once during peak periods, responding within minutes using Nerdify's internal platform.
- Investigated disputes and refund concerns by gathering supporting details and handing complex cases to the appropriate team with context.

SKILLS

Customer support: Written support, customer email, issue triage, evidence gathering, escalation, bug reproduction, release QA.
